

For Immediate Release

Olympic success for Claromentis as their communication tool assists in the deliverance of a safe and secure Olympic Games.

London, UK, August 17th – Claromentis, a global supplier of innovative web platforms, worked in partnership with CFOA National Resilience to develop a communication tool for the London 2012 Olympics.

The communication tool named, Assurance Toolkit provided CFOA's fire and rescue teams with a centralised location to manage exercises and training, capture incidents and coordinate appropriate actions. The ability to generate detailed reports ensured that critical information relating to each incident and its outcome was captured.

Assurance Toolkit, was rapidly deployed as it was built upon Claromentis' framework and integrates seamlessly with CFOA's intranet system.

For further information please see the case study:

CFOA's Technical Officer, Danny Slay comments: *"The software developed by Claromentis helped us before and during the Olympic Games and I am sure it will leave a legacy after the Olympics."*

Claromentis' Information Architect, Michael Christian comments: *"Assurance toolkit ensures that critical information is captured, issues are resolved and all parties are kept up-to-date in real-time."*
